

Godbout® Collection
Topo Design

nienkämper

The design objective is that the Godbout® Chair has a modern faceted look with very stylish legs.

A faceted geometric shape which gives the impression of floating over the ground, due to the sled tubular base. The Godbout® Chair has a plywood frame construction with reinforced steel in a tubular shape.

The Godbout® Chair would work well as a lounge chair for a reception area or even as a guest chair.
